

### **Eclipse at Fruit Focus 2005**

Fruit Focus is the industry's premier national show for soft fruit growers, a unique forum for key players to meet.

This year's show takes place on Wednesday July 27th, 09:00 to 16:30 at East Malling Research; Eclipse will be there (Stand 62) and look forward to meeting existing and future customers. Members from the Pesticide Residue Analysis team will be available to discuss testing schedules, sample testing and other aspects of Eclipse services.

Due diligence testing remains a priority for the whole fruit industry. Restec@Eclipse now offers an even wider multiresidue screen and faster turnarounds, ensuring that your product quality is maintained and proven.

We shall be demonstrating the capabilities and flexibility of our internet portal system for accessing and trending test results. Not only providing instant access to completed test results, portal is also an invaluable management tool, available to all our key customers.

Restec@Eclipse, Stand 62 - see you there!
