

UKAS Testing - Multi-site Accreditation

Eclipse now has 'multi-site accreditation' - one testing schedule is in place to cover most of the Group's testing activities in the UK (ie not including our Portlaoise laboratory in Ireland). Instead of each individual site having its own testing schedule and separate number, all sites operate under the same laboratory number - UKAS Testing No 1282 - Group.

Of course, in most cases, our customers will continue to deal with their 'local' laboratory; however, samples may be tested at another Group site provided that the appropriate facilities and personnel are in place. The work will be carried out to a common standard, consistent with that required of a UKAS accredited testing laboratory.
